The SDx Credit Union

SDx : Software Defined Everything

“any physical item or function that can be performed as or automated by software”

- SDX Central

SDx : Software Defined Credit Union

“software network layer **providing** advance **security** and network **flexibility** controlled by policies around traffic, systems, and people, **instead of static** security rules & routing.”

- Kyle Stutzman, VP Pure IT

Security - Compliance Security - Compliance Security - Compliance Security - Compliance Security - Compliance

Cost

- Storage implemented in software, instead of hardware
- Performed successful implementations

Hyperconvergence

Software Defined Network (SDN)

- Improves network agility, security and cost efficiency
- Implementation in progress

- Virtual and centralized computing
- Successful implementations

Virtual Desktop Interface (VDI)

User Control and Identity Management

- Control access and permission at the user level, instead of the device
- Implementation in progress

- Consistent and Predictable Workflows
- Implementation in progress

Automation Engine

Policy-based Automation

- Infrastructure
- Storage
- Security
- ID management

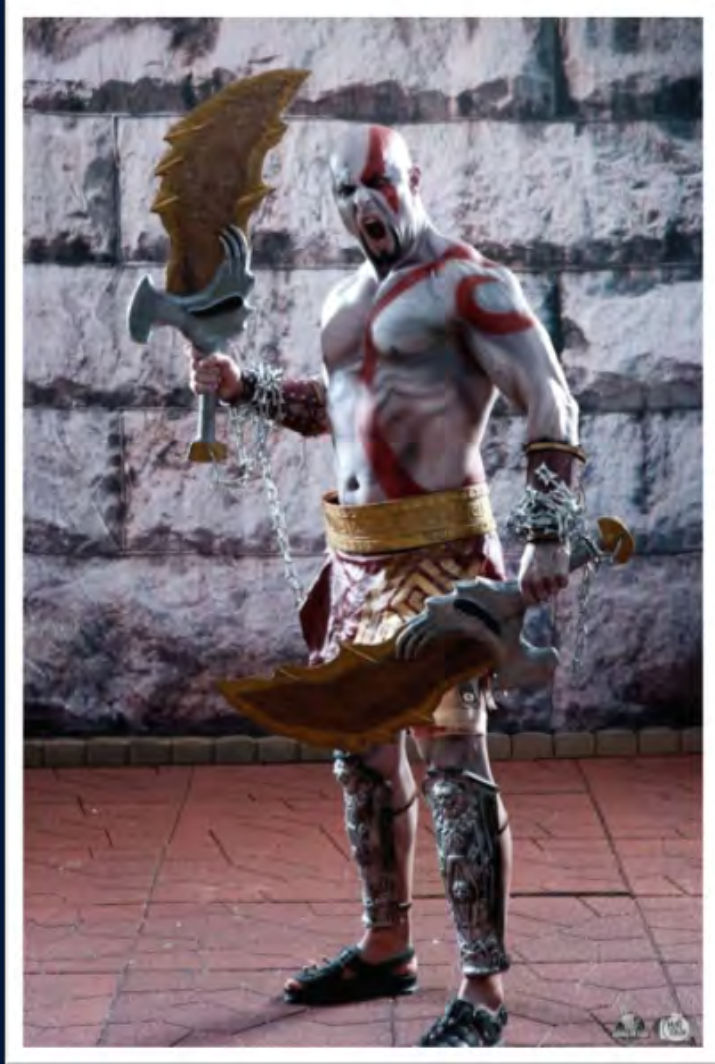

Agility

Security - Compliance Security - Compliance Security - Compliance Security - Compliance Security - Compliance

Strategic Roadmap Tactical Steps

A man in a dark suit and tie is shown from the chest up, holding a glowing, futuristic digital interface. The interface features a 3D wireframe of a tall building, a bar chart, and various data panels. The background is a dark blue with circuit-like patterns and the text "NETWORK SEARCH".

Unleash Your Credit Union
